**Career Counselling Session with Univariety:**

*8th February, 2017*

With the onset of 2017, and the eleventh graders on the brink of going to be twelfth graders, the time was ripe to orient them to the careers in store for them. Grade XI attended a career counselling session held by Univariety.

Students of all the three Streams attended the session – the commerce students saw various aspects of the business world out there; the science students were shown the various aspects of engineering and students from the Humanities stream were shown the many more career options for them.

The session began with a mind cracking puzzle underlining the fact that students who wanted to pursue engineering require the zeal for solving complicated problems and the curiosity to learn and create. Students were given an insight on the various entrance examinations, various colleges in India and a guide chart. The session was a very informative one.

And thus we reach a suitable *slutet*. It is often said that a man is like a novel: until the very last page you don't know how it will end. Otherwise it wouldn't even be worth reading." This academic year was filled with joy and amusement. We shall return afresh in the next academic session. Till then *au revoir!*
