A REPORT ON INTER-HOUSE CONTEST - CREATIVE WALL ART STD. I

“Art speaks where words are unable to explain”

Since earliest times when humans draw images on the walls of the caves, art has been our means of recording our human experience and of making sense of our world.

The creative skills children develop through an art carry them towards new ideas, new experiences and new challenges.

An inter- house Creative Wall Art contest was held for class 1 on 26th October 2016. The students created beautiful wall art.

A healthy competition was organized to boost up their creative exercise to identify their expression and elicit in them a sense of responsibility.

Students have participated actively and enthusiastically and very well executed their talents.

The contest saw an amazing display of children’s imagination and hidden skills to exhibit their class extraordinarily.
