## REPORT ON INTER HOUSE COMPETITION, STD. VIII

### NUMERICAL AND LOGICAL REASONING

Date: 04.08.2016

An Inter House **Numerical and Logical Reasoning Competition** for class VIII was held on 4th August, 2016 in the school. The objective of the competition was to assess how well students can interpret data, graphs or statistics, how well they can use basic arithmetic to solve numeric and logical problems. The test was designed to identify an individual's ability to deduce conclusion using given information.

On the final day three set of questions were distributed among all the students. Students had to solve 20 questions in 30 minutes. From each section the highest scorer of each House got selected. Separate question paper was given to the students in case of a tie.
