

Delhi Public School, Hyderabad

Grades I & II - Field Trip

Venue – Nehru Zoological Park

Field trips enrich and expand the curriculum, strengthen observation skills, increase children's knowledge in a particular subject area and expand children's awareness of their own community. Students might be good at reciting and remembering things but they often don't make the connection unless they experience it first-hand. Such experience is provided by field trips as children will be able to connect the dots of the learning experiences with real experiences. This was what the students of classes I and II of Delhi Public School experienced when they went to Nehru Zoological Park for the field trip, on 24th December 2019.

The purpose of this field trip was to provide students with an educational experience outside their everyday routine. The day started on a peppy and exciting note. All the students, along with their teachers and the support staff were fully geared to start their journey for the zoo. They enjoyed their bus ride (to-and-fro) through the city singing rhymes and songs. As soon as we reached our destination, all the children and the teachers had their breakfast.

Soon after their fill, each troop of children started exploring the animal kingdom. While exploring, they came across various species of animals, birds and reptiles that are not usually seen in our surroundings. Followed by this, we all sat for a joyous toy train ride which took us around the zoo park, giving us the opportunity to listen different sounds of animals and birds and also see so much greenery around us in today's crowded world.

The field trip came to an end and we were back to school by 01:20 pm. All the children shared a laugh with their friends and had their lunch. They also shared their thoughts and experience about the trip with their friends and teachers. Overall, it was a day that was spent well giving us wonderful memories to cherish.
